

CODEBOOK – DATASET ATTACKS1

In this dataset we gather the number of attacks in major States in the Milky Way from 2022 to 2024. This data has been coded by external researchers with expertise in their own countries and from data coming from State authorities, news articles, and other testimonies.

country (character): name of the State

year (numeric): year (2022 – 2024)

nkill (numeric): number of individuals killed during that year in a given country

continent (character): continent of the State
