

CODEBOOK – DATASET ATTACKS2

In this dataset we gather information on all the attacks that happened in major States in the Milky Way in 2025. This data has been coded by external researchers with expertise in their own countries and from data coming from State authorities, news articles, and other testimonies.

id: identification number of the attack

country (character): name of the State

year (numeric): year (2022 – 2024)

month (numeric: 1 to 12): month of the attack

type (character): bomb, knife, poison, or accident. Accidents are considered unintentional bombings and collateral damage carried out by violent actors in the preparation of their attacks.

gdp (numeric): Gross Domestic Product in thousands of euros.

population (numeric): in absolute numbers.

mountain (numeric): number of mountains per 1000 square kilometres.

democracy (numeric: 1 to 10): level of democracy, being 1 total autocracy and 10 total democracy.

nkill (numeric): number of individuals killed in that attack

temperature (numeric): average temperature during that month in ° C.
